Career Objective

Aspiring **Data Analyst** and **Full Stack Developer** with expertise in **data analytics, business intelligence, and web development**. Proficient in **Python, SQL, Excel, and Power BI** for data-driven insights and decision-making, along with hands-on experience in **MERN stack (MongoDB, Express.js, React.js, Node.js)** for building scalable web applications. Passionate about leveraging **data science, machine learning, and cloud computing** to develop innovative solutions. Seeking a dynamic role where I can apply my analytical and technical skills to drive business growth and enhance user experiences.

Education

Dr. A. P. J. Abdul Kalam Technical University, Lucknow, Uttar Pradesh	Sep 2022 – Aug 2025
<i>Bachelor of Technology in Computer Science Engineer</i>	<i>RD Engineering College, Ghaziabad</i>
Board of Technical Education Uttar Pradesh	Aug 2019 – Sep 2022
<i>Diploma in Mechanical Engineering (Production)</i>	<i>Government Polytechnic Ghaziabad</i>
Board of High School and Intermediate Education, Uttar Pradesh	Apr 2019
<i>PCM</i>	<i>SKIC Niwari Ghaziabad</i>
Board of High School and Intermediate Education, Uttar Pradesh	June 2017
<i>PCM</i>	<i>SKIC Niwari Ghaziabad</i>

Technical Skills

Programming Language: Java, C, JavaScript, Python

Technology: MS office, HTML, CSS, Bootstrap, Tailwind, Amazon Web Services(AWS), ReactJS, ExpressJS, NodeJS, Pandas

Database: MySQL, MongoDB, RDS

Developer Tools: VS Code, Git, PyCharm, Power BI

Relevant Coursework

- | | | | |
|------------------------|-----------------------|--------------------------|-------------------------|
| • Data Structures | • Algorithms Analysis | • Operating system | • Systems Programming |
| • Software Engineering | • Database Management | • Big Data and Analytics | • Computer Architecture |

Summer Internship

BABA AUTOMOBILIE PVT LTD. | Online CNC Programming Project Based Learning **15 Nov 2021 - 15 Dec 2021**

- During my Online CNC Programming Project-Based Learning Internship, I learned CNC programming by working on different projects. I used programming skills to control and run machines. This helped me understand how CNC machines work, how to write code for them, and how they are used in real-world situations. I also improved my problem-solving skills by fixing issues and making the programs run better.

Projects

Pizza Place Sales Analysis Excel, Python, Pandas

December 2024

- * Analyzed a year's sales data from a fictitious pizza place, including order details and pizza types.
- * Used **Excel** for visualization and **Python with Pandas** for trend analysis, identifying best-selling items and peak sales hours.
- * Provided insights to improve menu and pricing strategies.

RoomRover Platform Website *MERN STACK*

October 2024

- * Designed and implemented a RoomRover website in December 2023, demonstrating expertise in full-stack web development with MERN. Crafted user-friendly interfaces, robust backend systems, and efficient search features to enhance user experiences. Collaborated within cross-functional teams to deploy projects successfully and drive continuous enhancements.
- * Collaborated with cross-functional teams to enhance RoomRover, integrating innovative features and refining user experiences for seamless accommodation bookings.
- * Technologies Used: - Front-end: EJS,CSS, JavaScript - Back-end: [MERN STACK] - Database: [MySQL] - OtherTools: [Bootstrap,Git,GitHub]

Obys Agency Web Developer *HTML, CSS, JavaScript*

May 2024

- * Developed a visually striking website using HTML, CSS, and JavaScript. Integrated advanced animations with GSAP for engaging user interactions.
- * Implemented dynamic scrolling effects with Locomotive Scroll and utilized SheryJS for enhanced functionality and interactivity.
- * **Link - <https://tarunkashyap03.github.io/Obys-agency/>**

Spotify Web Page Clone *HTML, CSS*

September 2023

- * Crafted a web app using HTML, CSS, and JavaScript, integrating the Spotify API for music exploration, user authentication, and playlist creation. Utilized Git for version control.
- * Recreating the visual elements and layout of Spotify's music streaming platform to provide a similar user experience.
- * **Link - <https://tarunkashyap03.github.io/Spotify-Project/>.**

PASSWORD GENERATOR *HTML, CSS, JavaScript*

October 2023

- * Created a secure password generator web app using HTML, CSS, and JavaScript. Enables users to generate strong, customized passwords. Emphasized clean design and ease of use.
- * This web application has a functionality that allows you to generate a password that can be a combination of letters, numbers, and symbols.
- * **Link - <https://tarunkashyap03.github.io/Password-Generator/>.**

Cab Booking System | Python, SQLite

April 2025

- * Developed a command-line based cab booking application with role-based access for Users, Dealers, and Admin
- * Implemented functionalities like user registration/login, cab booking/cancellation, dealer cab management, and admin-level data control.
- * Integrated SQLite database to manage users, dealers, cabs, and bookings efficiently with CRUD operations.
- * Focused on backend logic, modular code structure, and real-world data flow simulation.
- * **Link - https://github.com/TARUNKASHYAP03/Python/tree/main/Cab_Booking.**
